# Meet Your Hosts – The COBALT Fellows

**Maria Wilke, Agricultural University of Iceland**

Maria is a PhD student at the Agricultural University of Iceland working on participation in coastal and marine planning. A bioregioning project is part of her exploratory research into the remote region of the Westfjords in Iceland and its governance systems. Maria's research interests are in marine governance, public participation, community engagement, environmental education and local knowledge.

**Jonny Norton, freelance systems practitioner, Nottingham, UK**

Jonny is an early career freelance systems practitioner. He has an environmental background, and now works with a number of initiatives working on systems change and transformation focusing on specific issues, sectors and geographies. He is passionate about using systemic tools and approaches to bring positive change on global issues.

**Ella Hubbard, University of Sheffield, UK**

Ella is a PhD student at the University of Sheffield. Her research uses participatory methods to explore how bioregioning is being used to reshape regional development. Her research interests include bioregioning, alternative economies and social movements.
